Attorney Docket: 081427-0306175

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the

application.

(Previously Presented) A chalk line device, comprising: 1.

a housing having a chalk line port and a chalk port, wherein the housing defines an

exterior surface and an interior space including a chalk reservoir in communication with the

chalk port;

a movable door secured to the housing over the chalk port to selectively open and

close the chalk port;

a chalk line support mounted in the interior space in the housing;

a chalk line having one end secured to the chalk line support within the housing and

another end with a hook disposed outside of the housing, wherein the chalk line extends

through the chalk line port; and

a retracting mechanism mounted to the housing and connected to the chalk line that

selectively retracts the chalk line into the housing and allows the chalk line to be extended

from the housing through the chalk line port;

wherein the exterior surface of the housing includes a side wall with a depression

formed therein that is shaped to receive the hook for storage, the depression having a mouth

that is flush with the side wall,

wherein the hook has a body with a line attachment device on one end and a finger

extending outwardly from the other end, the finger engaging the depression during storage so

that the body can lie against the exterior surface.

2. (Cancelled)

3. (Cancelled)

(Cancelled) 4.

Attorney Docket: 081427-0306175

(Original) The chalk line device of claim 1, wherein the door to the chalk port is

mounted to one side of the housing and the depression is located on a different side of the

housing.

(Original) The chalk line device of claim 1, wherein the housing has walls and the 6.

door is mounted on one wall of the housing and the depression is located on another wall that

extends at an angle to the side wall with the door.

7. (Original) The chalk line device of claim 1, wherein the housing has walls and the

door is mounted on one wall of the housing and the depression is located on a another wall

that is located on an opposite side of the housing.

The chalk line device of claim 1, wherein the retracting mechanism 8. (Original)

includes a handle with a knob and the housing further includes another depression arranged to

receive at least a portion of the knob when the handle is stored.

9. (Original) The chalk line device of claim 1, wherein the side wall has a plurality of

grip depressions.

10. (Original) The chalk line device of claim 1, wherein the housing includes a

translucent window.

11. (Original) The chalk line device of claim 10, wherein the housing has walls and the

translucent window is located on a wall of the housing and the depression is located on

another wall of the housing.

12. (Original) The chalk line device of claim 10, wherein the depression is formed on the

translucent window.

13. (Original) The chalk line device of claim 1, wherein the depression has an edge.

14. (Original) The chalk line device of claim 13, wherein the edge forms an acute ledge.

Attorney Docket: 081427-0306175

(Original) The chalk line device of claim 1, wherein the depression is spaced from the 15.

chalk line port about a length of the hook.

(Previously Presented) A chalk line device, comprising: 16.

a housing having a chalk line port and a chalk port and defining an a sealed interior

space including a chalk reservoir in communication with the chalk port, wherein the housing

includes a translucent window forming at least a portion of a wall of the chalk reservoir;

an amount of powdered chalk retained within the chalk reservoir, wherein the amount

of powdered chalk retained within the chalk reservoir can be viewed through the translucent

window;

a chalk line support mounted in the interior space in the housing;

a chalk line secured to the chalk line support and extending through the chalk line

port; and

a retracting mechanism mounted to the housing and connected to the chalk line that

selectively retracts the chalk line into the housing and allows the chalk line to be extended

from the housing through the chalk line port.

(Original) The chalk line device of claim 16, wherein the translucent window forms 17.

substantially at least one side of the housing.

18. (Original) The chalk line device of claim 16, wherein an inside surface of the

translucent window is polished to prevent chalk from sticking to the inside surface of the

translucent window.

19. (Previously Presented) The chalk line device of claim 16, wherein the translucent

window includes a scale to indicate a level of the chalk in the chalk reservoir.

20. (Original) The chalk line device of claim 19, wherein the scale includes three lines

with words low, medium and high inscribed beside each respective line.

21. (Original) The chalk line device of claim 19, wherein the scale includes four lines

with the markings ¼, ½, ¾ and full inscribed beside each respective line.

Attorney Docket: 081427-0306175

22. (Original) The chalk line device of claim 16, wherein the housing is formed of plastic

and the window is formed of plastic.

23. (Original) The chalk line device of claim 16, wherein the housing is formed of metal

and the window is formed of plastic.

24. (Original) The chalk line device of claim 23, wherein the housing and the window are

integrally formed.

25. (Original) The chalk line device of claim 24, wherein the housing is over-molded

with opaque material.

26. (Original) The chalk line device of claim 25, wherein the over-molded opaque

material is one of a plastic and rubber.

27. (Original) The chalk line device of claim 26, wherein the plastic is a soft plastic.

28. (Previously Presented) The chalk line device of claim 16, wherein the translucent

window is textured with varying textures to highlight a viewing zone for viewing a level of

the chalk in the chalk reservoir.

29. (Original) The chalk line device of claim 16, wherein the window is transparent.

(Currently Amended) The chalk line device of claim 16, wherein the translucent 30.

window comprises a transparent zone and a [[translucent]] light diffusing zone.

(Original) The chalk line device of claim 16, wherein the window is arranged to cover 31.

substantially a whole length of a face of the housing.

32. (Original) The chalk line device of claim 16, wherein the housing has a depression

that retains an end of the chalk line.

Attorney Docket: 081427-0306175

33. (Original) The chalk line device of claim 32, wherein the chalk line has a hook and

the depression is shaped to engage the hook.

34. (Original) The chalk line device of claim 32, wherein the housing has walls and the

depression is located on one wall of the housing and the window is located on another wall of

the housing.

35. (Original) The chalk line device of claim 32, wherein the depression is formed on the

window.

36. (Previously Presented) A chalk line device, comprising:

a housing having a chalk line port and a chalk port, wherein the housing defines an

exterior surface and an interior space including a chalk reservoir in communication with the

chalk port;

a movable door secured to the housing over the chalk port to selectively open and

close the chalk port;

a chalk line support mounted in the interior space in the housing;

a chalk line having one end secured to the chalk line support within the housing and

another end with a hook disposed outside of the housing, wherein the chalk line extends

through the chalk line port; and

a retracting mechanism mounted to the housing and connected to the chalk line that

selectively retracts the chalk line into the housing and allows the chalk line to be extended

from the housing through the chalk line port;

wherein the exterior surface of the housing includes a side wall with a depression

formed therein that is shaped to receive the hook for storage, and the housing includes a

translucent window forming at least a portion of a wall of the chalk reservoir, the depression

having a mouth that is flush with the side wall.

37. (Original) The chalk line device of claim 36, wherein the housing has walls and the

depression and the window are formed on a same wall of the housing.

Attorney Docket: 081427-0306175

(Original) The chalk line device of claim 37, wherein the depression is formed in the 38. window.

(Original) The chalk line device of claim 36, wherein the housing has walls and the 39.

depression and the window are formed on different walls.

(Original) The chalk line device of claim 36, wherein the depression is spaced from 40.

the chalk line port about a length of the hook.

(Original) The chalk line device of claim 36, wherein the depression has an edge and 41.

the hook has a finger that engages the edge.

(Original) The chalk line device of claim 41, wherein the edge forms an acute ledge. 42.

(Original) The chalk line device of claim 36, wherein the window forms substantially 43.

one side of the housing.

44. (Original) The chalk line device of claim 36, wherein the window is arranged to cover

substantially an entire length of one side of the housing.

The chalk line device of claim 36, wherein an inside surface of the 45.

translucent window is polished to prevent chalk from sticking to the inside surface of the

translucent window.

The chalk line device of claim 36, wherein the translucent window 46.

includes a scale to indicate a level of chalk quantity in the chalk reservoir.

47. (Original) The chalk line device of claim 46, wherein the scale includes three lines

with words low, medium and high inscribed beside each respective line.

48. (Original) The chalk line device of claim 46, wherein the scale includes four lines

with the markings 1/4, 1/2, 3/4 and full inscribed beside each respective line.

Attorney Docket: 081427-0306175

49. (Original) The chalk line device of claim 36, wherein the translucent window is textured with varying textures to highlight a viewing zone for viewing a level of chalk in the

chalk reservoir.
